Re: St. Stephen Martyr Church
School Renovation

To Whom It May Concern:

We would like to take this opportunity to commend your company for the fine work in the construction of the above referenced project.

The professional attitude, coordination of sub-contractors, and craftsmanship more than meet our expectations. The on-site superintendent anticipated problems and worked out solutions before they became a problem. The project management was conducted with accuracy and in a timely fashion so that all paper work, requests for payments, project documentation and costs were never an issue.

The finished project is one that the school, the contractor, the community and this office can be proud of.

We would highly recommend your firm for any construction project. We hope that we have the opportunity of working with you on future projects.

Sincerely yours,

William M. Welch, Architect
